

**Description:** This workshop is designed to engage and educate high school youth regarding sustainable practices in crop production. Participants will learn through hands-on activities and field encounters lead by expert Purdue faculty, staff, graduate students and industrial leaders. Participants will have the opportunity to experience the research being conducted at Purdue University and in industries that address global food security, reduction of environmental impact, and sustained economic and social standings.

**Who should attend? Everyone!**

Those with interests in the following topics: agronomy, agriculture, sustainability, environmental sciences, social and economic sciences.

Those who are interested in learning more about the efforts being done to sustain the future of the environment, global food and economical security.

Those who want to learn more about where their food comes from and how everyday consumer choices influence agriculture.

Those who want to learn more about career and educational opportunities behind the science of agriculture.

Enrollment is restricted to the first 20 applicants.
