Answers can be found in the OSU Beef Resource Handbook – 4-H 117R.

Purdue University is an equal access/equal opportunity institution.
This material may be available in alternative formats.

1. Electric shocks are always a risk when working in wet or damp areas. You should use a _____ interrupter with water heaters, power tools, and other electric equipment.
2. The _____ (also known as the bowknot or reefer's knot) is the standard knot used to tie an animal to a post or stall at the fair.
3. Knot users consider the _____ knot one of the most useful knots. It is a nonslip knot, as such it can be used to form a loop that will not tighten or draw down.
4. Beef, swine, and dairy cattle are partially _____ and have poor depth perception.
5. The key to safely handling animals is being aware of and respecting animals comfort or _____.
6. A preconditioned calf has been:
 - Protected by _____ against several diseases.
 - Treated for _____ and _____ parasites.
 - _____, if it is a bull calf.
7. Worm eggs are passed in the manure of cattle and picked up when cattle graze. Calves should be dewormed at _____.
8. There are two types of flies that are major pests to cattle: the _____ fly and the _____ fly.
9. Handlers should also be concerned with zoonotic diseases, which are illnesses that can be transmitted between humans and animals. Five of these include:

_____	Leptospirosis	_____
Rabies	_____	_____

Answers can be found in the OSU Beef Resource Handbook – 4-H 117R.
