

AG DAYS 2023

2023 Ag Days

On September 26th-27th, over 500 third graders from all over the county came to the Harrison County Fairgrounds to learn about agriculture. Youth explored topics related to livestock, drones, grain bin safety, dairy, embryology, soil health and the nutritional aspects of plant parts, rabbits, horses, soil and water, and tractor safety.

The students were provided lunch that consisted of an all-beef hotdog, bag of local popcorn, baby carrots, clementine, ice cream and a bottle of water. A special thank you to the organizations who sponsored and assisted with lunch. Finally, all teachers and students received a goodie bag full of fun agricultural items to explore at home and back in their classrooms.

Thank you to ALL of our sponsors, guest speakers, and partnerships for your support with our 2023 Ag Days. This event was a success thanks to your contributions.
