

4-H Beef/Dairy Beef

Jasper County
Record Sheet A
Grade 5

Name: _____ 4-H Club _____

1. If the handler never allows the animal's _____ to drop, a steer or heifer will seldom escape.
2. The _____ (also known as the bowknot or reefer's knot) is the standard knot used to tie an animal to a post or stall at the fair.
3. Knot users consider the _____ knot one of the most useful knots. It is a non-slip knot, as such it can be used to form a loop that will not tighten or draw down.
4. Beef, swine, and dairy cattle are partially _____ and have poor depth perception.
5. The key to safely handling animals is being aware of and respecting animals comfort or _____.
6. Livestock animals have wide angle vision. They can see everything except what is in their _____, which is directly behind them.
7. There are four basic types of identification: _____, _____, _____, and freeze branding.
8. The _____ is not a desirable form of identification, simply because of the damage it causes to the _____, the _____ on the animal and special equipment that is required.
9. Separate new animals on the farm from the rest of the herd for _____ to _____ days. Also separate animals you have taken to a show from the animals left at the farm because show animals have been in contact with other animals and could have contracted a disease organism.
10. There are two types of flies that are major pests to cattle: the _____ fly and the _____ fly.
11. Ringworm is a _____ that gets into the skin and develops a rough skin condition where the hair drops out in patches. You can get ringworm on your skin by handling infected cattle. You should wear _____ when handling infected animals.
