4-H Enrollment!
October 1, 2021
thru
January 15, 2022
v2.4HOnline.com

Children K-12:

Parents/Guardians can go into 4HOnline (v2.4HOnline.com) to enroll/re-enroll their children in 4-H for 2022 between October 1st, 2021 and January 15th, 2022.

Adult Volunteers:

Must enroll/re-enroll in 4HOnline (v2.4HOnline.com) as an adult volunteer, sign the 2022 Adult Behavioral Expectations, and complete the required trainings BEFORE January 15!

If you need assistance or do not have internet access, please contact the Extension Office or e-mail, Alex, Brooke, or Lisa so we can help!

It is the policy of the Purdue University Cooperative Extension Service that all persons have equal opportunity and access to its educational programs, services, activities, and facilities without regard to race, religion, color, sex, age, national origin or ancestry, marital status, parental status, sexual orientation, disability or status as a veteran. Purdue University is an Affirmative Action institution. This material may be available in alternative formats.

4-H News

IT'S PAPER CLOVER TIME!

OCTOBER 6-17TH 2021

Funds support 4-H camp and leadership activities.

TSC Clover Campaign

Since 2010, Tractor Supply has partnered with 4-H to help create *Opportunity4All* and raise more than \$14 million through the Paper Clover campaign. The success of these campaigns has impacted over 81,500 youth by providing them with the tools and resources they need to move forward and reach their full potential

100% of funds raised through the bi-annual Paper Clover campaign directly benefits 4-H youth.

90% of donations directly support 4-H youth in the state where the funds were raised.

10% percent supports the overall mission and growth of 4-H nationally.

Altering Recipes for Better Health

The Dietary Guidelines for Americans recommends fat, sugar, and sodium they consume and add more fiber by eating whole-grain products and more fruits and vegetables.

individuals reduce the daily amount of

One way to improve your diet is to use less fat, sugar and salt in the recipes that you prepare at home. Some recipes can be made healthier simply by reducing an ingredient or substituting one for another.

To start with, try these general reductions and substitutions in your recipes:

- ◆ Reduce sugar by 1/3
- ◆ Fat can often be reduced by 1/3
- ◆ Leave out the salt or reduce it by 1/2
- ◆ Replace 1/4 to 1/2 of refined flour with whole-grain flour
- ◆ Use yogurt or cottage cheese instead of sour cream in some sauce and dip recipes
- ◆ Choose low-fat cheese in place of higher fat cheese
- ◆ Substitute skim milk for whole milk in most recipes
- ◆ Use evaporated milk or whipped, nonfat dry milk in place of whipped cream in some recipes

You can also use these tips to achieve specific nutrition goals and make your recipes more nutritious.

Pumpkin Bread Recipe

Cal/Serv: 295	Yields: 2	Total Time: 1 Hour 20 Mins
---------------	-----------	----------------------------

Ingredients:	2 sticks unsalted butter 2 ½ c. all-purpose flour 1 c. light-brown sugar 1 c. granulated sugar	2 tsp. baking powder 1 tsp. baking soda 2 tsp. cinnamon ¾ tsp. ground cloves	2 c. grated pumpkin 3 large eggs ½ c. Buttermilk 1 ½ tsp. vanilla extract
---------------------	---	---	--

Directions: Preheat oven to 350 F. Butter and flour two 9- by 5-inch loaf pans or two 8-inch cake pans and set aside. Combine flour, sugars, baking powder, baking soda, and spices in a large bowl. Add grated pumpkin and toss. Whisk eggs, buttermilk, butter, and vanilla in a medium bowl and stir into dry ingredients. Transfer to prepared pans and bake on middle shelf of oven until a wooden skewer inserted into center of bread tests clean, about 35 minutes. Cool in pans on a wire rack. Run a knife around edges to release bread from pans.

Health & Human Sciences

Fall Armyworm Emergence

Fall armyworms have been moving north from the southeastern part of the country into grassy areas near us, including, but not limited to lawns, hay fields, and corn. These worms move in large numbers and can consume a significant amount of foliage in a relatively short time period.

When looking to identify fall armyworms, the moth has dark gray mottled forewings with a white speck near the end of each wing. Larvae start off green but then grow and develop into light tan or nearly black with three yellow lines that go down their backs. You'll also find a white inverted Y-shape between their eyes if looking closely enough.

When scouting fields, it's important to identify these worms before they grow bigger than one inch in length because at that growth point, the challenge to control them becomes much more difficult. Typically, management is not necessary for these worms unless half of the planted area displays signs of fresh feeding and the worms are less than one inch in length. In this case, there are numerous insecticides available to help control this pest.

For assistance, please feel free to call the Purdue Extension-Pike County Office at (812) 354-6838 or you can visit: <https://extension.emtm.purdue.edu/fieldcropsipm/insects/fall-armyworm.php>.

Pumpkin Facts

- The name pumpkin comes from the Greek word 'pepon', meaning 'large melon'.
- Scientifically speaking, pumpkins are a fruit (they contain seeds) but when it comes to cooking, they are often referred to as vegetables.
- They vary in weight but an average sized pumpkin might weigh around 13 pounds.
- Pumpkins are popular decorations during Halloween. A carved pumpkin illuminated by candles is known as a 'jack-o'-lantern'. The tradition is believed to have come from Ireland, where they used to carve faces into turnips, beets and other root vegetables as part of the Gaelic festival of Samhain.
- 100 grams of pumpkin produces around 26 calories of energy.
- Giant pumpkins can be grown for competitions, with some weighing over 1000 pounds! In 2020, at the 47th World Championship Pumpkin Weigh-Off, a new record was set at 2,350 pounds by Travis Gienger from Anoka, Minnesota!
