

Embryology : ***The Study of Life***

With this program, I bring an incubator and chicken eggs to your classroom to hatch. The eggs take 21 days to hatch. I come beforehand to set up the incubator and read a story about the process. I can also take the chicks after they hatch or you can give them away.

schedule this program.

Soybean Science:

This program shows that science and engineering can be fun AND educational. This program increases awareness about using renewable natural resources, such as soybeans, for making industrial products. A hands on activity includes making lip balm from soybean oil.

schedule this program.

Calm Down Jars:

Talk to youth about stress, mental health and things they can do to calm their nerves and help deal with different situations.

Need access to warm water and probably best done outdoors...a little messy but fun!

schedule this program.

Captain Cash:

An interactive educational program designed to teach basic financial management skills to your students. "Captain Cash" includes four classroom enrichment sessions of approximately 45 minutes each that focus on earning, saving, spending, and borrowing money. Each session introduces vocabulary words and one or more basic economic concepts. Each session also includes a game or activity and a take-home handout. (third grade only)

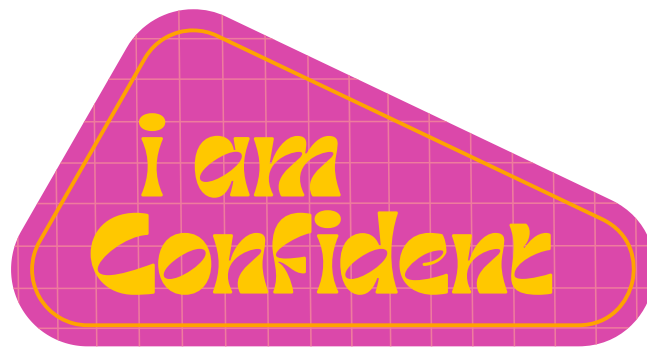

Contact Megan Broughton to schedule this program for your 3rd grade students. mcbrough@purdue.edu

Bully Beans:

*Read a bully beans book, talk about "I" messages
and play Bully Beans Bingo.*
