

# WANT TO GET INVOLVED WITH BLACK SOLDIER FLY COMPOSTING?

## Benefits

- Wide variety of organic waste streams as possible feedstocks
- Mature compost in as little as 21 days
- Larvae serve as a protein source for animal feed

## What do you need to know?

- Adults are short-lived, do not feed nor transmit any diseases
- There are multiple generations per year, but the flies suffer mortality at temperatures below 55°F

Do you want to get involved by composting with BSF at your home/on your farm? Scan this code to indicate your interest. Or email [lingwell@purdue.edu](mailto:lingwell@purdue.edu)
