

HOME VEGETABLE GARDENING

This series offers current and aspiring vegetable growers the opportunity to learn from experts about ways to increase the success and satisfaction of quality vegetable production in their gardens.

Session 1 - April 8

Getting Started in Vegetable Gardening

- Selecting site and plants
- Sizing up your garden and tools
- Soil preparation techniques
- Plant spacing and layout

Vegetable varieties

- Types/seasons of plants
- Crop rotation

Session 2 - April 15 (Dr. Laura Ingwell)

- Pest Management
- Insect Management
 - Integrated pest management
 - Organic pest management
 - Pest identification & pesticide use

Session 3 - April 22 (Dr. Cesar Escalante)

Disease Management

- Diagnosing plant problems
- Disease management (identify, manage, and prevent)

Participants of this three-week series will learn about modern vegetable production practices appropriate to home growing. They will also learn about how to manage diseases and pests in a sustainable manner.
