

PURDUE EXTENSION'S **INVASIVE SPECIES SIGNATURE PROGRAM**

Invasive species are a major threat to Indiana's ecosystems and economy, causing significant harm to native plants, animals, and habitats. These non-native species often outcompete and displace native species, leading to a loss of biodiversity and increased costs for management and control.

In this educational series led by *Purdue Extension* experts, you'll learn how to:

- Identify, report, track, and control invasive species in aquatic, forest, agricultural, and home landscape settings.
- Choose and incorporate native plants into your home landscaping.

Don't miss out on this opportunity to make a positive impact!

Purdue Extension Daviess and Knox Counties are proud to present the 2024 invasive species program.

April 16 – Introduction to Invasive Species and Reporting, Recording, and Tracking

*Meeting Location: Southwest Purdue Agricultural Center
(4669 Purdue Rd. Vincennes, 47591)
