## Outcome Indicators in Digital Measures

### Short term with Learning Events

“Outcome Indicators” are statements created from the Outcomes/Impacts posted on logic models. These indicators are used to capture key results of Extension efforts.

Select outcome indicator(s) only if event is complete and results are in hand as reported for this month, and enter the number. If learning event has multiple sessions over time greater than a month, you may choose to put outcome indicators only in the month with the last reported session of the learning event, or, you may report the outcome indicators with an impact statement.

### Medium and Long-term with Impact Statements

Select the outcome indicator(s) for this program or project and provide the number, but don't duplicate these if you have or another team member has already reported outcome indicators elsewhere.

### Outcome Indicators

Pulling from the logic models for the Program Area Themes, here is a listing of outcome indicators.

### HHS

Short-term outcome indicators for HHS are provided for education of at least one hour that results in participant gain in knowledge or intention to change a behavior.

For short-term HHS outcome indicators, look to report them in LEARNING EVENTS in Digital Measures.

<b>HHS - Outcome Indicators</b>
<b>Family resource management</b>
# of individuals who learn about financial literacy (earning/income, spending, saving and investing, borrowing, and/or protecting)
# of individuals who learn about consumer decision-making
# of individuals who increased their awareness of how spending choices impact overall finances
<b>Health and Wellness</b>
# of individuals who learn about ways to improve their health and well-being
# of individuals that reported an intention to increase physical activity and/or reduce sedentary time in their daily lives
<b>Foods and nutrition</b>
# of adults that gained knowledge about eating more of healthy foods
# of adults that reported an intention to eat more of healthy foods
# of adults that gained knowledge about eating less of foods/food components which are commonly eaten in excess
# of adults that reported an intention about eating less of foods/foods/food components which are commonly eaten in excess
# of adults that gained knowledge on healthy eating patterns
# of adults that reported an intention to adopt healthy eating patterns
# of food handlers receiving food safety training and education in safe food handling practices
# of youth that reported eating more of healthy foods
# of adults that reported eating more of healthy foods
# of adults that reported eating less of foods/food components which are commonly eaten in excess
# of adults that reported adopting healthy eating patterns
<b>Human development</b>
# of individuals who learn about healthy child and/or family development
# of individuals who learn about expressing emotions, handling stress and/or positive communication.

Reporting of medium and long-term outcome indicators in HHS is done through a coordinated effort in Signature/Statewide programs. Extension specialists who report the IMPACT STATEMENTS will include the outcome indicators. There will not be a listing of medium and long-term outcome indicators in Digital Measures for HHS. If Educators are looking to report medium and long-term outcomes for a unique County effort, they would do that by writing an Impact Statement in DM.
