

# 4-H Horse & Pony

Jasper County  
Record Sheet B  
Grade 9

Name \_\_\_\_\_ 4-H Club \_\_\_\_\_

Leader Signature: \_\_\_\_\_

### Across

- The incubation period for a horse with \_\_\_\_\_ is 2 to 14 days.
- Equine \_\_\_\_\_ Myeloencephalitis (EPM) symptoms can vary from slight gait abnormality to obvious limb weakness to lameness.
- Immunity can be permanent or temporary. Temporary immunity must be boosted with \_\_\_\_\_.
- \_\_\_\_\_ new animals is an important prevention in the spread of disease, as is isolating sick ones.
- Most horses that recover from Equine Encephalomyelitis suffer from \_\_\_\_\_ damage.
- Influenza is a virus that causes loss of appetite, dullness, depression, and nasal \_\_\_\_\_.

### Down

- A horse is hyper-responsive to light, sound, and touch with some neck stiffness. He also has an old puncture wound on its forearm. What could he be suffering from? \_\_\_\_\_
- Quarantine is recommended if a horse is suspected of being exposed to rabies. Nursing and \_\_\_\_\_ rest is recommended.
- When giving a horse an injection it is important that the person knows the correct \_\_\_\_\_ to give it.
- The young foal gets its first \_\_\_\_\_ from colostrum produced by the mare.
- Rhinopneumonitis (Rhino) causes a cough with clear nasal discharge and a slight \_\_\_\_\_.

**Trail Class Specifics:**

1. If you want to build a bridge with a slight arc or rise as it goes toward the middle, do not have more than a half-inch \_\_\_\_\_ per foot of length. If the bridge has too much \_\_\_\_\_, it can become very \_\_\_\_\_ in wet weather.
  
2. The gate needs to be at least \_\_\_\_\_ feet high and \_\_\_\_\_ feet long.
  
3. Design your own trail class using the following obstacles in it:
  - \* Gate
  - \* Mail Box
  - \* 4 Cones
  - \* Bridge
  - \* Trot-Over Poles
